Paediatric Anaesthetic Practitioners Simulation Course

OVERVIEW AND OBJECTIVES

In this 1 day simulation course, we will aim to build confidence in learners ability to recognise and manage **common paediatric anaesthesia emergencies** through simulation scenarios and skill sessions, enable learners to **understand the differences** between adult and paediatric patients in anaesthesia and build confidence in **anxiety management** in the paediatric setting.

TARGET AUDIENCE: Any operating department practitioner (ODP) or anaesthetic nurse working in an anaesthetic practitioner role
